DocuWare 5 meets the requirements of important test standards

The new DocuWare 5 software generation has been tested and certified by independent institutions. The key test criteria included data and system security and storage guidelines. Certifications from software developers and hardware manufacturers vouch for DocuWare's easy and seamless integration capability with other applications.

DocuWare 5 has been tested on the basis of FDA Rule 21 CFR Part 11 and complies with the regulations of the U.S. Food and Drug Administration. This means the document management system can be used by companies in the pharmaceutical and food industry inspected by the FDA. You will find the results of the audit in the 'DocuWare AG Regulatory Compliance Follow-up Audit Report.'

DocuWare 5 meets all requirements concerning the tamper-proof long-term archiving and safekeeping of business data under the regulations of the German Commercial Code (Handelsgesetzbuch, HGB) and the German tax code (Abgabenordnung, AO). The software also complies with the principles of correct computer-assisted accounting systems, as well as the principles surrounding the access to and audit ability of digital data. A summary of these test results is included in the Ernst & Young certification report.

DocuWare 5 meets the high requirements of the United States of America Department of Defense (DoD) according to the DoD standard 5015.2-STD. This defines the basic performance requirements that must be met by commercial records and document management applications, before they can be applied in the DoD and its component agencies.

DocuWare 5 has been successfully tested on Microsoft platforms including Windows 2003 Server, Windows XP Client and SQL Server 2005, thereby passing the Windows platform test. The tests were carried out independently by VeriTest, a test service of Lionbridge Technologies, Inc.

DocuWare CONNECT to SAP has undergone the standard SAP test and been certified by SAP AG. The Microsoft .NET-based interface is augmented by SAP NetWeaver solutions with features for archiving documents and data via the SAP ArchiveLink interface. The functionalities of three components were certified: SAP HTTP Server, Barcode BAPI and OLE Frontend.

EMC Centera storage systems integrate seamlessly in DocuWare 5. The certificate confirms that even large volumes of electronic data can be stored in Centera storage systems direct from DocuWare in a secure, tamper-proof format for long-term digital archiving.

Network Appliance has certified the integration of DocuWare 5 with its NetApp SnapLock storage technology. DocuWare 5 can be used with NetApp SnapLock to store business-critical data in a tamper-proof, long-term format. The solution combines the advantages of the document management system with the high access speed of a hard disk, backed up by the security of a WORM medium.

DocuWare 5 has undergone extensive testing by Hewlett-Packard and has been certified for HP File System Extender (FSE) 3.4. The HP FSE software is a file system archiving product for storing and managing large volumes of data at low cost. Standardized interfaces ensure smooth integration with DocuWare.
